## New Location Provides Foundation for Continued Growth of Entech Engineering's Pottsville Office

*Pottsville, PA* – Entech Engineering, Inc. (Entech) has announced the relocation of its Pottsville Office.

Entech joined the Pottsville business community more than 30 years ago to better serve clients in Schuylkill County. While the business address has changed a few times since the office was established in 1990, the office benefits from team members who have been there since the beginning, including Senior Project Manager, Don Cuff, Environmental Project Manager, Kara Humes, and Technical Assistant, Missy Dando.

The new office is now home to 20 engineers, environmental scientists, and project representatives who serve a diverse list of municipal, industrial, higher education, and healthcare clients. Entech is currently providing engineering services for local projects involving water, wastewater and stormwater system improvements, municipal facility upgrades as well as environmental consulting for a variety of public, private and industrial clients, including a tenant fit out for Alvernia College Towne in Pottsville.

Entech President, Robert Weir, PE, shared:

*"I'm excited about the growth and expansion of our Pottsville office. Entech's roots in Pottsville and Schuylkill County run deep, and it's been a privilege to work with such a great team of professionals over the years. Our new office is up and running due largely to the extraordinary efforts of Miller Bros. Construction, who made the construction process seamless throughout this transition."*
