Entech Helps the Waymart Authority Break New Ground

Reading, PA – Entech Engineering, Inc. (Entech) is proud to announce the groundbreaking effort for the Waymart Area Authority to allow them to upgrade the existing wastewater treatment plant. The Authority, with the design assistance of Entech, will be able to meet the new flow requirements imposed by the Pennsylvania Department of Environmental Protection and increase the efficiency of the current plant, which serves the Waymart Borough, Canaan Township, and the area prisons.

Pennsylvania Senator, Lisa Baker, has been successful in helping the Authority obtain funding for the \$275,000 project. This grant money will help reduce the costs for residents, as well as local businesses.
