Entech Acquires Chicago-Based Environmental Consultant, AWRC, Inc.

READING, PA – Entech is pleased to announce the acquisition of America’s Water Resource Consultants, Inc. (AWRC), an environmental services firm located near Chicago, Illinois. AWRC was founded by Mark Williams, PG in 1996. Mr. Williams will be joining Entech’s Environmental Services team and will continue to manage the Chicago Office.

Entech President, Jeffrey Euclide, stated:

We’re excited to be bringing AWRC and its employees into the Entech family. We have worked together with AWRC in the past and found their culture and values to align closely with ours. Like Entech, AWRC has consistently delivered high-quality services, leading to many long-term client relationships. This will be our first expansion outside of Pennsylvania, and is ideally situated for Entech to better serve clients located throughout North America.

This is Entech’s first acquisition and aligns with recent strategic planning efforts for growing the company. The purchase of AWRC diversifies and expands Entech’s client base into new markets.

Entech Executive Vice President, Robert Weir, stated:

“The AWRC acquisition gives Entech exposure to the public transit market. Our goal is to continue the high-quality standards for environmental services to these clients, established by AWRC while adding capacity through Entech’s environmental team. We also look forward to gaining additional understanding of the challenges facing public transit as they manage their facilities to be more energy efficient and to use more renewable energy, so we can help them make more informed decisions as they modernize their facilities and fleets.”

Mark Williams, PG, Owner and founder of AWRC added:

“Having worked with Entech in the past, it seemed like a great fit to bring both companies together, and I look forward to the opportunities it will bring for AWRC staff and clients alike.”
