Entech Establishes Permanent Lehigh Valley Office, Cementing Growth and Regional Leadership Since 2020

Reading, PA – Entech has officially opened a permanent office in the Lehigh Valley at 2239 PA Route 309, Suite 1, Orefield, PA, formalizing a regional presence that has been rapidly expanding since 2020.

Over the past several years, Entech has steadily grown its footprint in the Lehigh Valley, adding talent, delivering projects, and building lasting client relationships across the region. What began as a strategic investment has evolved into a significant and growing operation, prompting the transition from temporary space to a dedicated, long-term home.

“This office is the result of real momentum, not just a new location,” said Robert Weir, PE, President of Entech. “We’ve been building our presence in the Lehigh Valley for years through our people, our projects, and our partnerships. Establishing a permanent office reflects both the strength of that growth and our long-term commitment to the region.”

The new space is designed to support a growing team and foster collaboration, while accommodating the flexibility of hybrid work. More importantly, it positions Entech to continue expanding its impact across one of Pennsylvania’s fastest-growing regions.

The Lehigh Valley office is led by Tori Morgan, a widely recognized and deeply engaged regional leader whose influence extends well beyond Entech’s work. Morgan currently serves as Chair of the Lehigh Valley Planning Commission, has previously served as a Township Commissioner in South Whitehall Township, and is actively involved in numerous nonprofit and community initiatives throughout the region.

“Growth in the Lehigh Valley isn’t just about development, it’s about the people, the culture, and supporting the work that makes it all possible done thoughtfully and collaboratively,” said Morgan. “Entech has been part of that conversation for several years, and this office allows us to be even more embedded in the community. We’re here, we’re invested, and we’re focused on helping shape what comes next for the region.”

With a permanent presence now established, Entech is positioned to continue expanding its team, strengthening partnerships, and delivering high-impact engineering and consulting services throughout the Lehigh Valley.
