Entech Welcomes Chris Cope

Reading, PA - Entech Engineering, Inc (Entech) is pleased to announce the recent addition of Chris Cope to our team as a Project Manager in the Civil and Environmental Resources (CER) division.

Chris brings nearly 30 years of experience in potable water and wastewater operating, managing, and consulting experience providing technical guidance on projects and working closely with clients to help them with their infrastructure, operational, and regulatory needs. A resident of the Lehigh Valley, Chris will be helping Entech to strengthen our presence and serve our client base in that region.

Bryon Killian, P.E., Director of CER, commented:

“We are very excited to have Chris join the Entech team as a Project Manager in the Lehigh Valley area. His extensive experience, first on the municipal side and later as a consultant, gives him a unique perspective and understanding of the challenges faced by our municipal clients.”

Chris added:

“I am excited to be a part of the Entech team. It is rewarding to be able to work with clients in my home area with whom I have established relationships in previous roles.”

About Chris:

Chris holds a Bachelor of Science degree from East Stroudsburg University in Environmental Science. He is licensed as both a Water and Wastewater Operator. Chris is active in several professional organizations, including the Pennsylvania Water Environment Association (PWEA), the Eastern Pennsylvania Water Pollution Control Association (EPWPCOA), American Public Works Association, American Water Works Association, Wildland’s Conservatory and Pretreatment Information Exchange (PIX), where he serves as a Board Member.

Chris’ hobbies include outdoor recreation at our cabin in the Pocono’s, golf, coaching, traveling with my wife and friends, Penn State football, general DIY projects, spending time with my family and dogs, and just seeing new places and enjoying new experiences!
